### **Pelco Delivers Energy Star Certified Full HD Displays**

Clovis, CA (July 28, 2010) – Pelco is excited to announce that its 32-inch and 24-inch monitors are now qualified as Energy Star products under the professional display/signage requirements for displays within this program. Energy Star certified models are now shipping and include the [Pelco PMCL532F and PMCL524F Full HD Displays](#).

“Delivering energy efficient products has been a goal for Pelco over the past two years. The entire company celebrates this achievement,” explains Barry Lawson, Pelco Product Marketing Manager for Viewing Solutions. “With this accomplishment, our company becomes an even stronger leader in the Security Solutions Industry.”

Backed with the Energy Star Certification – a first for Pelco – the company is proud to deliver [Full HD](#) picture quality to the desktop, with the new 24- and 32-inch models. Ideal for installations that demand unparalleled image quality with a conservative footprint, these monitors deliver 1080p Full High Definition video that captures all the detail of today’s megapixel cameras. Designed for the rigorous around-the-clock demands of surveillance, these energy-efficient displays carry a three-year warranty – backed by Pelco’s unmatched commitment to customer satisfaction.

The Energy Star program encompasses more than 35 product categories, each with a unique specification of energy performance requirements that a product must meet to qualify for the label. Product manufacturers may use the label to identify those models that meet the energy performance requirements. The Pelco PMCL524F and PMCL532F displays now meet those requirements and offer significant energy savings and a return on investment through increased energy efficiency.
