

# Pelco-Certified Field Service Assistance

## ENDURA® SYSTEM CONFIGURATION AND NETWORK PROGRAMMING

### Product Features

- Network Switch Programming
- System Configuration
- System User-Specified Configuration

The security industry is requiring higher levels of complexity in video security systems, placing a more demanding burden on the system integrator. To help system integrators recognize income for this complex work, Pelco offers many services, including **Endura® certified field service assistance**, which may be resold to the end customer. All services are sold at dealer pricing and are discountable based on the system integrator's discount pricing.

### Network Switch Programming

Pelco **trained and certified field service** assists the system integrator with the programming of network switches in a closed, Endura-specific network (not including installation and cabling of the system). Service features include the certification of all cabling and the programming of network switches to achieve the best and most reliable Endura system performance.

For shared networks, Pelco's **field service assistance** provides advice to the IT professional about how to configure a network for optimum Endura system performance.

### System Configuration

Pelco **trained and certified field service** is available to assist the system integrator in configuring the hardware for optimum Endura system performance in a closed Endura-specific network (not including installation and cabling of the system). Service features include verifying proper video input levels, ground loops, and network and video cabling.

For shared networks, Pelco's system configuration assistance provides advice to the IT professional about how to configure a network for optimum Endura system performance.

### System User-Specified Configuration

Pelco **trained and certified field service** assists the system integrator with a final configuration of the Endura system per the needs of the end customer. System configuration includes the naming of cameras, creating rights and privileges, setting up alarm configurations, configuring analytics profiles for specific cameras, configuring maps, and optimizing system performance. System configuration also includes a final configuration between the Endura system and a Pelco matrix switcher. General operation of each Endura component is checked and corrected as necessary.

# GENERAL INFORMATION

## PRICING

- All services are charged at a daily rate, with a one-day minimum.
- All prices are dealer discountable.
- Travel and expenses are charged separately based on actual costs, \$75 maximum per diem, and hotel stays at the going rate for the location for standard (3-star) hotels.

## SCHEDULING

- Trips are based on schedules mutually agreed upon by Pelco and the system integrator. Advance notice is encouraged for best scheduling and lowest travel costs.
- Cancellations are subject to a 15% fee.
- Standard working hours, 8:00 A.M. to 5:00 P.M.

## TERMS AND CONDITIONS

- Work is to be performed as outlined in this document.
- Final sign-off is required by the system integrator.
- Further maintenance of the system is the responsibility of the system integrator unless additional service is purchased.

## SYSTEM INTEGRATOR RESPONSIBILITY

- Installation of all components of the system including UPS, network switches, and cameras.
- All cable routing and dressing of cables.
- All environmental conditions including air conditioning, cleanliness, and safety.
- A thorough understanding of the system performance requirements of the end customer.
- Arrange to have a certified technician on-site to assist the Pelco field service provider.

## ORDERING INFORMATION

Use the following ordering codes to specify the desired Endura (E) field service (FS) package.

FSENP	Network Switch Programming
FSESC	System Configuration
FSEUC	System User-Specified Configuration
