

ExSite Enhanced Compact 2 Series

EXPLOSION-PROOF PROTECTION IN TIGHT HAZARDOUS ZONES

ExSite Enhanced 2 Series Compact brings explosion-proof coverage to smaller restricted zones with flammable gases, such as manufacturing lines, mixers and loading points. Its compact footprint and high-resolution imaging help teams spot issues quickly without bulky hardware.

EXPLOSION-PROOF IN A SMALL FOOTPRINT

Enhance safety in tight hazardous spaces with explosion-proof housing designed so internal sparks or heat don't ignite flammable gases or dust near line-side equipment.

STAINLESS-STEEL CONSTRUCTION

Extend service life in corrosive sites with AISI 316L stainless steel that resists salt, chemicals and frequent washdowns in food, chemical and marine applications.

CLEAR IMAGING IN TIGHT SPACES

Spot issues quickly with high-resolution imaging and low-light capability that provide sharp views of conveyors, fills and packaging zones.

RELIABLE IN EXTREME WEATHER

Maintain visibility year-round with wide temperature ratings and sealed housing that withstands wind, rain, snow and airborne contaminants.

SMART ANALYTICS

Enhance safety and compliance with Pelco Smart Analytics that detect and classify people and vehicles and surface unsafe behavior or abnormal activity.

OPEN, FLEXIBLE INTEGRATION

Simplify system design with ONVIF conformance for easy integration with leading VMS platforms and deploy confidently in regulated environments with NDAA compliance.
