

ExSite Enhanced 2 Series Fixed

EXPLOSION-PROOF VISIBILITY FOR HAZARDOUS SITES

ExSite Enhanced 2 Series Fixed delivers explosion-proof coverage for restricted areas with flammable gases, giving targeted views of pumps, valves and loading arms. It helps operators confirm leaks, flames and status lights while resisting corrosion and extreme temperatures.

EXPLOSION-PROOF PROTECTION

Enhance safety in hazardous areas with explosion-proof housing designed so internal sparks or heat don't ignite flammable gases or dust.

STAINLESS-STEEL DURABILITY

Extend service life with AISI 316L stainless-steel construction that resists corrosion from chemicals, salt and cleaning agents in harsh industrial sites.

CLEAR IMAGING IN TOUGH LIGHT

Capture usable detail with high-resolution imaging, wide dynamic range and low-light performance in scenes with flare, shadows and low illumination.

RELIABLE IN EXTREME WEATHER

Maintain visibility year-round with wide temperature ratings and sealed housing that withstand wind, rain, snow and airborne contaminants.

SMART ANALYTICS

Focus operators on key events with Pelco Smart Analytics that detect and classify people and vehicles and highlight activity that needs attention.

OPEN, FLEXIBLE INTEGRATION

Simplify system design with ONVIF conformance for easy integration with leading VMS platforms, and deploy confidently in regulated environments with NDAA compliance.
