

ExSite Enhanced IR 2 Series PTZ

EXPLOSION-PROOF CLARITY IN LOW-LIGHT CONDITIONS

ExSite Enhanced 2 Series IR PTZ gives industrial sites long-range visibility around tanks, walkways and loading zones in low light and bad weather. It combines explosion-proof design, stainless-steel housing and IR PTZ coverage for areas where flammable gases may be present.

EXPLOSION-PROOF IR PROTECTION

Enhance safety in hazardous zones with explosion-proof housing designed so internal sparks or heat don't ignite flammable gases or dust, while built-in IR improves low-light visibility.

STAINLESS-STEEL RELIABILITY

Extend long-term performance with AISI 316L stainless steel that resists corrosion from salt, chemicals and washdowns in offshore, petrochemical and industrial plants.

LONG-RANGE IR ILLUMINATION

Improve low-light coverage with built-in IR that provides long-range visibility in darkness, helping operators see activity around tanks, walkways and loading zones.

WIDE-AREA COVERAGE

Capture wide areas and zoom into events with smooth PTZ control and powerful optics that let teams focus quickly on equipment, personnel or incidents.

SMART ANALYTICS

Focus response on real threats with Pelco Smart Analytics that detect and classify people and vehicles and elevate critical events in complex scenes.

OPEN, FLEXIBLE INTEGRATION

Simplify system design with ONVIF conformance for easy integration with leading VMS platforms and deploy confidently in regulated environments with NDAA compliance.
