

# Spectra Enhanced 8 Series PTZ

## WIDE-AREA COVERAGE FOR LARGE-SCALE SITES

Spectra Enhanced 8 Series PTZ helps security teams manage large campuses, city intersections, transit hubs and industrial sites with 360° coverage and 30x zoom. Smart analytics and auto-tracking help operators spot activity sooner, focus on real threats and protect sensitive areas.

### WIDE-AREA COVERAGE

Keep large areas in view with continuous pan, tilt and 30x zoom, helping teams see activity across scenes, reduce blind spots and cover more ground with fewer cameras.

### SMART ANALYTICS ALERTS

Focus on what matters with Pelco Smart Analytics that detect and classify people and vehicles, generating events for suspicious activity so teams respond to real threats instead of watching screens.

### PRECISE, RESPONSIVE CONTROL

Track moving activity smoothly with low-latency pan/tilt and direct drive technology, helping operators get on target quickly and keep critical details in view.

### EFFICIENT COVERAGE, LOWER COST

Use a single camera where multiple fixed devices were needed before, helping cut installation and maintenance effort while lowering the chance of missed events in blind spots.

### RELIABLE PROTECTION

Extend the life of your investment with five years of Pelco coverage that supports long-term deployments, simplifies lifecycle planning and protects budgets over time.

### OPEN, FLEXIBLE INTEGRATION

Simplify system design with ONVIF conformance for easy integration with leading VMS platforms, helping you reuse existing infrastructure while protecting devices and data.
