

Description

AI enhances real-time awareness by analyzing video at the edge and in the cloud to detect unusual activity, objects and potential threats. AI capabilities integrated across Pelco cameras and Elevate cloud services –such as motion, object and firearm detection—help operators focus on critical events, reduce response times and improve decision-making.

Model Purpose

- Visual object detection
- Video tracking
- Visual classification
- Visual segmentation
- Tamper detection
- Audio classifications

Components

Model Trained with Customer Data	No
----------------------------------	----

1st or 3rd Party Model	Both
------------------------	------

Generative AI	No
---------------	----

Type of Media AI Can Process	Video, Audio
------------------------------	--------------

Customer Data AI Can Access

Data Ownership	Customer Owned & Controlled
----------------	-----------------------------

Data Retention	Customer Determined
----------------	---------------------

The customer determines the final configuration of how the AI within this product is used. For more information visit: motorolasolutions.com/ailabels.
