

Pelco + Genetec: Better together

INTEGRATED SECURITY FOR OPERATIONAL CLARITY

Pelco's robust and ruggedized device portfolio seamlessly integrates with Genetec Security Center, an enterprise-level platform known for its open architecture. Together, they form a scalable and complete security system that combines video security and license plate recognition into a single interface, resulting in intelligent insights, reliable performance and simplified operations.

COMPREHENSIVE DEVICE CONTROL

Gain full control over all of Pelco device functions and configurations, including pan-tilt-zoom and specialty models, natively with the [Pelco Connect](#) plugin all within the Security Center.

SIMPLIFIED SYSTEM MANAGEMENT

Simplify system management and eliminate the need for separate tools to conduct advanced forensic searches using Pelco's rich metadata, all from a familiar Genetec interface with the [Pelco Connect](#) plugin.

ROBUST SYSTEM RESILIENCE

Help ensure uninterrupted system operations in the most challenging environments with Pelco's ruggedized and reliable hardware complementing Security Center's secure architecture.

ENHANCED SITUATIONAL AWARENESS

Provide operators with greater insights into unfolding events with Pelco's high-quality image capture technology and edge analytics to generate rich data that feeds directly into Security Center's powerful search and alert systems.

Pelco and Genetec are better together. Pelco's trusted ONVIF-conformant hardware seamlessly integrates with Genetec's powerful, secure open-platform VMS, for enhanced control, intelligence and operational efficiency across all security environments.
