

Pelco + Hexagon: Better together

UNIFYING VIDEO AND COMMAND FOR ENHANCED INSIGHT

Pelco's robust and ruggedized device portfolio integrates deeply with Hexagon's enterprise-level public safety and infrastructure platforms. This partnership delivers critical visual intelligence, enhancing operational awareness through reliable hardware, advanced insights and unified integration for comprehensive command and control.

ROBUST SYSTEM RESILIENCE

Pelco's ruggedized devices are engineered to perform reliably in challenging conditions, providing a continuous, high-quality video feed. This robust hardware works in conjunction with Hexagon's HxGN dC3 Video, with built-in failover functionality and robust data protection, to help maintain continuous operation.

ENHANCED SITUATIONAL AWARENESS

Pelco's high-quality image capture and specialized devices provide precise visual information that seamlessly feeds into Hexagon's common operational picture and Physical Security Information Management (PSIM) platforms, enriching real-time data with critical visual context.

QUICKER INVESTIGATIONS AND RESPONSE

Pelco's Smart Analytics generates intelligent metadata that fuels Hexagon's native forensic search tool Qognifinder, to help operators search and retrieve footage using common language criteria such as the color of clothing or cars and vehicle subtypes such as trucks and motorcycles.

UNIFIED OPERATIONS AND EFFICIENCY

Pelco devices integrate smoothly with Hexagon's open architecture and "Smart Driver" approach allowing for unified control of video streams and device functions directly within Hexagon's command and control interface.

Pelco and Hexagon are better together. Delivering an integrated operational intelligence system, uniting Pelco's cameras, devices and sensors with Hexagon's advanced public safety platforms, for enhanced control, intelligence and operational efficiency across all security operations.
