

VIDEOMANAGER ON-PREMISES LICENSE OFFERINGS

ENSURE YOU HAVE THE VIDEOMANAGER ON-PREMISES LICENSE WHICH MEETS YOUR ORGANIZATION'S UNIQUE NEEDS.

CAMERA LICENSE (CONNECT OR PLUS)

VM-EPL-VB/VTCON1 OR VM-EPL-VB/VTPLUS1

These licenses are required in order to use your VB- or VT-series cameras with VideoManager. They also enable the following functionality:

FEATURES		CLOUD PRO	CLOUD ULTRA
12 MONTHS OF SOFTWARE ASSURANCE	Phone and email support, and access to new VideoManager releases within the 12 month period.	✓	✓
STREAMING	Stream live footage from your body-worn cameras back to VideoManager, over WiFi.	✓	✓
ONSTREAM	Use VideoManager to serve live-streams and recordings from your body-worn cameras back to an ONVIF-compatible Video Management System (VMS). This enables you to view - and record - footage in your VMS of choice.	✓	✓
BODY-WORN CAMERA MANAGEMENT	Administer your suite of body-worn cameras from VideoManager. This includes assigning body-worn cameras to ensure that all recorded footage can be traced back to a specific user, and upgrading body-worn cameras to the most recent firmware. Customize a wide variety of recording behavior for body-worn cameras, such as haptic feedback, LED behavior, pre-/post-record and video resolution.	✓	✓
USER MANAGEMENT	Manage and streamline your workers' access to VideoManager using granular permissions, groups, and roles. Meet your organization's security policies with comprehensive password policies, automatic account locking after incorrect password entries and two-factor authentication.	✓	✓
REPORTS	Collate information about high-level system parameters - such as user behavior, camera field trips and equipment availability - into one downloadable CSV file.	✓	✓
CUSTOMIZABLE USER INTERFACE	Integrate VideoManager into your organization's brand identity with a configurable color scheme, logo and default language.	✓	✓
INCIDENTS	Group footage from body-worn cameras and other imported media into evidence bundles. Enables you to clip and redact videos in line with evidentiary requirements, and then share or export.	✗	✓

HQ BASE

VM-EPL-HQ-BASE

This license enables more powerful VideoManager features, in addition to the functionality provided by your **CONNECT** or **PLUS** camera license.

FEATURES

CENTRAL VIDEOMANAGER	Enables hierarchical architecture with oversight over multiple installations: one instance of VideoManager acts as a Central VideoManager (which controls licensing, configuration and metadata) while other instances connect to it as sites.
STREAMING SERVER EXPORT	Use your body-worn cameras to simultaneously stream footage to a cloud VideoManager instance and download footage to an on-premises VideoManager instance.
COMMANDCENTRAL EVIDENCE UPLOAD	Upload incidents to the Motorola Solutions CommandCentral product suite.
IDENTITY MANAGEMENT	Export a VideoManager user list with one click, then easily modify and re-import, or quickly migrate to another instance.
USER IMPORT TOOL	Automatically sync your existing user database with VideoManager to easily manage joiners and leavers and ensure up-to-date user permissions. Compatible with multiple sources, including Azure AD™.
COMPOSITE CLIPS	Compile multiple, parallel viewpoints of an event into one video within an incident, then watch the clips back simultaneously.
VB COMPANION	Watch and categorize VB400 footage securely while still in the field using the VB Companion Android app. Once your VB400 is redocked, all footage is automatically offloaded to VideoManager.
MEDIA PROPERTIES	Meet your organization's media categorization requirements with VideoManager's powerful custom fields (including dropdowns, checkboxes, and date/time fields).

SOFTWARE ASSURANCE

By default, your VideoManager license comes with 12 months of Software Assurance - this grants you access to VideoManager releases within that period. You can also add extra Software Assurance to your license, to ensure your organization always has the most up-to-date software with the newest features.

PART CODE

DESCRIPTION
